WNS’ DIGITAL METER-TO-CASH SOLUTION

SUPERIOR OUTCOMES DRIVEN BY SMARTER, INTEGRATED BUSINESS PROCESSES
The utilities industry finds itself at a crossroads in a disruptive business landscape. Achieving sustainable value in a market driven by heightened customer expectations, stringent government regulations, stiff competition and technological upheavals is proving to be a formidable challenge.

Even as companies adapt to these game-changing shifts, they are facing massive implications in the form of:
- High cost-to-serve
- Increasing capital expenditure
- Poor customer satisfaction
- Low return to shareholders
- Stagnant, decreasing revenue driving many utilities towards liquidation

With the pace of external change being what it is, enterprises are being compelled to look inwards as they strive for transformative value. Meter-to-Cash (M2C), with its expansive ambit – customer sales, revenue generation, customer interaction, data management and technology adoption – represents a golden opportunity for utilities to unlock pervasive business value.

However, M2C has traditionally been looked at through the IT systems prism (from a functional point of view) and not so much from a holistic business perspective. This has meant that utilities have not been able to realize the benefits that an optimized, unified and digitally enabled M2C process can deliver.
THE WNS DIGITAL METER-TO-CASH SOLUTION: CO-CREATING DELIGHTFUL END-CUSTOMER EXPERIENCE WHILE ACCELERATING BUSINESS OUTCOMES

The WNS Digital M2C solution re-invents, integrates and optimizes the end-to-end process, placing the customer at the center of technology- and analytics-infused operations.

WNS’ Digital M2C is a holistic solution precision-engineered to plug gaps and drive transformative gains through:

Intelligent Automation: Bringing the power of robotic process automation to back-office processes.

Digital Shift: Leveraging next-gen artificial intelligence and chatbots to re-define customer interactions.

Business Process Re-design: Driving agility and customer centricity in business processes through best-in-class methodologies and frameworks.

Data Analytics: Forming the backbone of insights-driven decision-making.
The WNS Advantage

Through its comprehensive Digital M2C solution for utilities, WNS negates the need for large IT overhauls and ensures:

- Improvement in customer experience
- Elimination of gaps and leakages
- Boost in operational performance
- Reduction in cost-to-serve
- Visibility across business and customer journey

Potential reduction of ~50-70 percent in operational expenditure within three years

THE WNS ADVANTAGE
